SUBJECT INDEX

Acid phosphatase
Tartrate-sensitive acid phosphatase, 264
Acute phase response
Acute phase response and clinically significant proteins, 154
AIDS
Legal and ethical concerns,108
Babesiosis
Case Studies, 245
Cell counters
Automated hematology analyzers: The Coulter S-Plus V, 30
Chemistry
Beckman reagents for the Hitachi 705, 135
Beckman reagents for the Technicon RA-1000, 209
Evaluation of a rapid test for HCG, 268
Tartrate-sensitive acid phosphatase, 264
Clostridium septicum
Case Studies, 247
Computers
Our first laboratory computer, 174
Cytology
Cytopathologic study of pleural fluids, 203
Developing countries
Health care in developing countries, 180
Drug screening
Drug screening of employees and athletes,112
Education
Off-campus graduate education, 68
Phlebotomy curriculum, 197
Student perceptions of teachers, 249
FDA
1976 amendments to the Food, Drug, and Cosmetic act, 258
Flow cytometry
Characterization of myelodysplastic syndromes with the Technicon H-1, 18
Glucose analysis
Reflectance meter glucose analysis, 195
Gram-negative bacilli
Identification of nonfermenting gram-negative bacilli, 253
Hematology
Adult acute leukemia, 12
Automated differential measurement applied to detecting the stimulation of lymphocytes, 75
The Coulter S-Plus V, 30
Characterization of myelodysplastic syndromes with the Technicon H-1, 18
Effect of storage time on reticulocyte counts, 213
Myelodysplastic syndromes: A review, 5
Treatment of acute myelogenous leukemia, 21
Hemostasis
Effects of exercise on hemostasis, 215
Patient data to identify alterations in clinical condition, 140
Hepatitis
The serologic diagnosis of viral hepatitis, 54
Hepatotoxicity
Liver function tests in hepatotoxicity, 49
Histology
Rapid trichrome mordanting, 177
Wright's staining "old" slide preparations, 139
Infection
Acute phase response and clinically significant proteins, 154
Hematologic changes in infectious disease, 158
Pathophysiologic effects of infection, 165
Physiologic response to infection, 150
Immunology
ELISA technique for detection of red cell antibodies, 218
Kidney function
Chronic renal failure, 230
Management of acute renal failure, 234
Pathophysiologic effects of infection on the kidneys, 165
Renal transplantation, 238
Legal issues
AIDS: Legal and ethical concerns, 108
Drug screening of employees and athletes, 112
Legal issues associated with physician office testing, 104
Professional negligence and the laboratory, 99
Leukemia
Adult acute leukemia, 12
Myelodysplastic syndromes: A review, 5
Liver
Hepatic disease and drug disposition, 60
Liver function tests in chemically-induced hepatotoxicity, 49
The serologic diagnosis of viral hepatitis, 54
Pharmacokinetics
Hepatic disease and drug disposition, 60
Phlebotomy
History of phlebotomy, 188
Phlebotomists and venous access devices, 191
Phlebotomy curriculum, 197
Reflectance meter glucose analysis, 195
Physician office laboratory
Legal issues associated with physician office testing, 104
Physician office testing in Connecticut, 131
Pleural fluids
Cytopathologic study of pleural fluids, 203
Reticulocyte counts
Effect of storage time on reticulocyte counts, 213
